Correspondence

There were no items of correspondence received during this meeting session.

Review of Geo-Thermal Issues

Mr. Smith updated the Committee membership on the recent problems discovered with the geo-thermal system at the new building site. Remedial workers are attempting to isolate the problem. A pressure gauge has been ordered and will be used to evaluate the seventeen lines coming directly into the building.
The problem could also be caused by one of the wells that may have blown. The pressure gauge will be used to determine what zone the problem is in. Once discovered, the problem will be addressed.

It was also discovered that the heat pump for the chilled beams has two compressors with water in them. This indicates that there is a leak in the heat pump. The Seymour schools’ System-Wide Maintenance Manager, Wayne Natzel, has contacted John Bender, the supplier of the heat pump who will assist in remediating the problem.

The P & D Company, installers of the geo-thermal system will also be contacted regarding the leakage problem with the system. The Town’s counsel is currently drafting a letter to the company expressing concerns with the system’s operating difficulties.
