Discussion with Construction Manager

Brian D’Orlando reported that the drilling for wells has begun at the building site. One will be in place within a day and one half to a two-day period. It will be a lengthy process as several hundred wells are scheduled to be installed.

Mr. D’Orlando also distributed a two-week work schedule outlining the work to be accomplished within the next two-week period. Foundations have been completed in the C area and the placement of structural steel is scheduled to take place during the coming week. Crews worked Friday and Saturday of the Easter weekend and much was accomplished due to this extra effort.
Mr. Kubik inquired if any headway had been made in curbing the six week delay on the project due to the inclement weather of the winter months.

Mr. Luzzi responded that two weeks of work were picked up due to the extra effort and work put in daily and during the Easter weekend.

Mr. Luzzi distributed a packet showing the financial status of the project. It also contained copies of approved CORs, CORs @ SPA, a PCO Summary Log, and a contingency balance report.
