List of Hazardous Intersections/Roadways for Bicycle Drivers (with some recommendations)

1. Crawford/Oak Grove intersection has visibility issues
2. Oak Grove/Whiskeag intersection - should be roundabout or T intersection. Also, have dashed road markings showing where main road goes (like the dashed line added to where Rte 209 and Parker Head road T down by Popham Beach).
3. Oak Grove at Five Corners - more dashed lines following Oak Grove.
4. Center St three-way stop and stop signs by Mae's Cafe and Court Street. Have engineer experienced in bike/ped designs make suggestions
5. Rte 209 - make sure any changes by State are bike/ped friendly
6. Perhaps signs at 4 way stops and 3 way(Center st) that bikes may take full lane. (Got told to get off the road at Center St while biking home from school with Jenny because we got in line with the rest of the cars.)
7. "Bikes may take full lane sign" on High St heading north near Rte 1 overpass where road narrows.
