

TOWN OF OCEAN VIEW

DELAWARE

September 5, 2019

TO: Mayor and Council
FROM: Carol S. Houck, Town Manager 
TOPIC: Lighting Details – Ocean Way Estate – Ogre Drive (District 3)

Background –

Following complaints raised about there not being any streetlights along Ogre Drive and the safety concerns raised we explored the opportunity of adding streetlights. Additionally, Councilman Maly received positive feedback about the addition at a meeting held Saturday, August 31st with residents. The following details the costs associated with the improvement:

Installation of 12 streetlights along Ogre Drive in accordance with the attached design:

- Will require the Town to pay Delmarva for the electricity used
- The charge for the lights/maintenance will be \$31 a month/ \$4,464 annually
- Delmarva Power will then maintain the lights

If the lights are installed within 10 feet of the transformers there will be no cost for installation. The design attached has taken this into consideration. If for some reason any are placed further away the cost will be \$4.75 a foot. Lights will be pedestal style and the disruption to the area will be minimal.

Once we provide the approval the work will likely be completed within 8 weeks.
