

Heads Together!

Mental & Emotional Health Fair

OCTOBER 10 | 6-8 p.m.

EVERETT MEREDITH MIDDLE SCHOOL

Child care is available for younger children upon request

Adolescence is a time of transition. Students are experiencing rapid physical, social and emotional changes. They're beginning to assert their independence and find their own identity. What do you do when you don't know what to do? Where do you go for help? We've assembled a panel of behavioral and mental health experts who'll talk about supportive services for children who are struggling. By putting our heads together, we'll help you identify services that link school and home so you can add balance to your child's life.
