

Pavement & Rehabilitation Project Will Require Daytime Lane and Shoulder on Central Avenue

The Department of Transportation (DelDOT) announces that their contractor George & Lynch Inc. is scheduled to begin a pavement and rehabilitation project starting on Wednesday, November 8 through mid-December.

Central Avenue from Route 26 to the bridge over Assawoman Canal will have intermittent lane and shoulder closures for milling, hot-mix patching, and paving. The work hours will be from 8 a.m. until 5 p.m. Monday through Friday, pending weather.

Every effort will be made to accommodate access to businesses and residences; however, some temporary or partial restrictions to accomplish this work should be anticipated.

Motorists should be aware that construction personnel and equipment will be operating in close proximity to the travel lanes and anticipate lane shifts. Flaggers will be on-site to direct motorists.

For more information, visit DelDOT online at www.DelDOT.gov or tune to WTMC-1380 AM.
